THE COMPANY

NAD-SHAD

The NAD S.L. to which part SHAD is of has more than 50 years of experience and is the market leader in the manufacturing of seats and cases for motorcycles of all major world brands in the sector. The production centers of seats, cases and fitting kits are located closed to Barcelona, with branch offices in China, USA, Indonesia, and Phillippines.

INNOVATION

Engineering and design have always been our hallmarks. We develop leading products in both our technical department and in cooperation with the engineering teams of major motorcycle brands. Our commitment to R&D has provided numerous innovative solutions for the market, that have made earned us various patents and design awards.

ENGINEERED FOR RIDING

DESIGNED IN BARCELONA
Since 1973

SEATS

The production of motorcycle seats marked the origin of the NAD company. In our 50+ year history, we have transitioned from an almost artisanal production to becoming leaders in the manufacture of OEM seats, with top clients such as BMW, Yamaha, Harley Davidson, Indian, Triumph. Our ability to adapt to the needs of our customers has allowed us to win the trust of major manufacturers around the world.

CASES

The quality of our products has led us to become worldwide leaders in the manufacturing of OEM cases. A little more than 30 years ago, we started to develop our own brand, SHAD, which from the very beginning has stood out for its quality, design and functionality. These qualities have strengthened its market position, while earning its recognition in the sector with numerous international awards.

DESIGN & INNOVATION PROCESS

RESEARCH TO INNOVATE

User feedback and analysis on how our solutions will be used in practice are the starting point. We combine market data, technology, and experience to detect opportunities for improvement or innovation. As a result, we define functional concepts that are viable and aligned with new mobility habits.

USER-CENTERED DESIGN

Each product is born from the integration of design and engineering. Our in-house team works transversally to solve technical, ergonomic and aesthetic challenges. The result is functional, durable solutions that are consistent with the rider's experience.

ENGINEERED FOR RIDING

FROM MODEL TO TESTING

We transform ideas into real solutions through prototyping and technical validation. We evaluate volume, aerodynamics, accessibility and aesthetics with foam or clay models and functional samples. Each iteration brings us closer to the final version of the product.

FROM ENGINEERING TO PRODUCTION

We integrate the entire value chain: design, validation, industrialization and production. This control allows us to guarantee quality at every stage. We work with specialized factories in Barcelona, Jakarta, and Shanghai, combining local and global capabilities to create reliable and durable products for both SHAD and leading motorcycle brands.

DESIGNED IN BARCELONA
Since 1973

QUALITY CASES LAB

LABORATORY TESTS:

Metrology scanning	Crash Test	Traction Test	Weathering Test	Textile Waterproofness Test
Shaker Test	Water resistance Test	Paint adherence Test	Dust resistance Test	Foam Compression Test

The quality of our products is based on continuous improvement, management excellence and customer satisfaction. We test our products in both static and dynamic tests, during all stages of development process and through each production, thus guaranteeing compliance with rigorous quality standards.

To test a case, we perform over 1,000 hours of laboratory testing in more than 20 different types of lab tests. Thanks to this quality testing, our products are designed to offer a long service life, ensuring performance, safety and durability over time.

We work on delivering the best final product to customer. That is why in SHAD we design, engineer and manufacture products covering all production stages under our constant testing control, since 1973.

ENGINEERED FOR RIDING

DYNAMIC TESTS:

We carry out dynamic road tests to study how our products perform in changing situations or under load over time. To test an adventure case, we travel more than 10,000 km in different conditions.

Functional prototypes lay on hands of the most experienced riders to ensure maximum resistance in extreme real conditions.

The dynamic tests, that challenge expert riders as the Dakar legend Joan Pedrero, let our engineering team adjust any fine tuning detail to its perfection.

Collaboration with local events and associations

Cruz Roja

SOCIAL RESPONSIBILITY

For years, SHAD has maintained collaboration and sponsorship agreements with organisations of our local community.

These actions range from supporting organisations such as the Red Cross, UNICEF, or the Hospital Sant Joan de Déu, to sponsoring the CF Mollet UE Genuine team and the CB Mollet 3x3 wheelchair basketball team.

The main objective of these agreements is to promote solidarity and inclusive sports, aligning their values of integration and effort with those of our company.

SHAD RIDER

Anyone who acquires a SHAD product is not just a customer — that action turns him/her into a **#shadrider**. Riders who share their adventures around the world through social media, creating a community that grows every day. More than a hundred riders sent images of their daily lives to the photo contest we organised, proudly showing their sense of belonging to the **#shadrider** community.

This spirit has also spread to our employees, some of whom took on the challenge of motorcycle touring by participating in the demanding Rider 500.

SPONSORSHIPS

SHAD's relationship with the motorcycling world is part of the company's DNA. Our brand awareness is carried out through international competitions such as the World Superbike Championship, and motorcycle touring events like the HAT Series or the 100 Colls. We also support renowned riders such as Joan Pedrero, Pol Tarrés, and Romain Dumontier (third place in the latest edition of the Dakar Rally).

INNOVATION HIGHLIGHTS

INTEGRATED FITTING SYSTEM

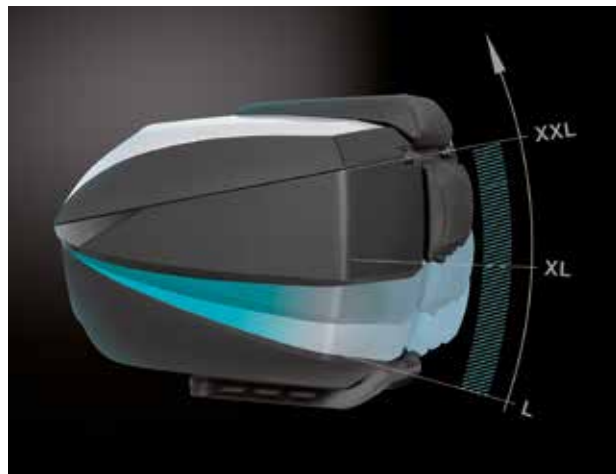

2015
PATENTED

The 3P System is the almost invisible side cases and bags fitting. It integrates its aesthetic into the motorcycle and allows a solid mounting with just 3 anchor points.

PIONEERS IN EXPANDABILITY

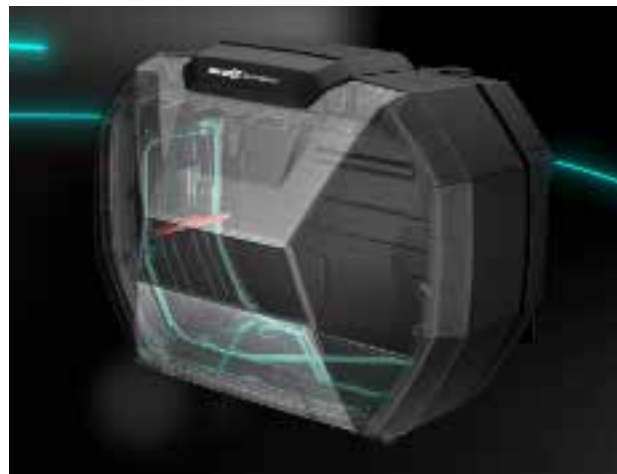

EXPANDABLE
2016
PATENTED

Innovation came after the research. In SHAD we created the first expandable top and side cases for the aftermarket.

Based on axial expansion, our top cases SH58X and 59X increase their volume in 3 possible positions.

SH38X
2024
PATENTED

A dynamic tensegrity system allows our SH38X to expand in a smooth telescopic way, up to one helmet capacity.

Now it is possible to adjust the 40% of capacity to every journey.

EQUIPMENT WITH MECHANISMS FOR YOUR ADVENTURE MODE

SHAD TERRA
2018
PATENTED

Designed for adventure touring our premium aluminum TERRA CASES combine strength, security, and style for long-distance travel.

SHAD TERRA
2022
PATENTED

Versatile and lightweight luggage solutions, our TERRA BAGS offer maximum resistance and minimum weight. Double security system is included in saddle bags. Perfect for any adventure trip.

MECHANICAL SYSTEM FOR TANK BAGS

CLICK SYSTEM
2023
PATENTED

The SHAD Click System is the latest evolution in motorcycle tank bag fittings, designed to offer comfort, safety, and quick installation. Its discreet integration and advanced technology, allows you to attach and release the bag with a single movement.

PIONEERS IN EXPANDABILITY

SH38X is the only expandable side case in the aftermarket. A telescopically expandable case that works thanks to an innovative system called DYNAMIC TENSEGRITY

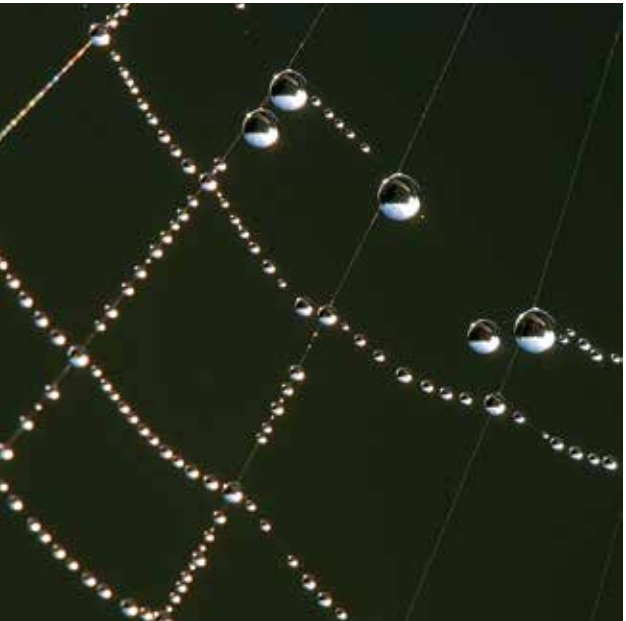

ENGINEERED FOR RIDING

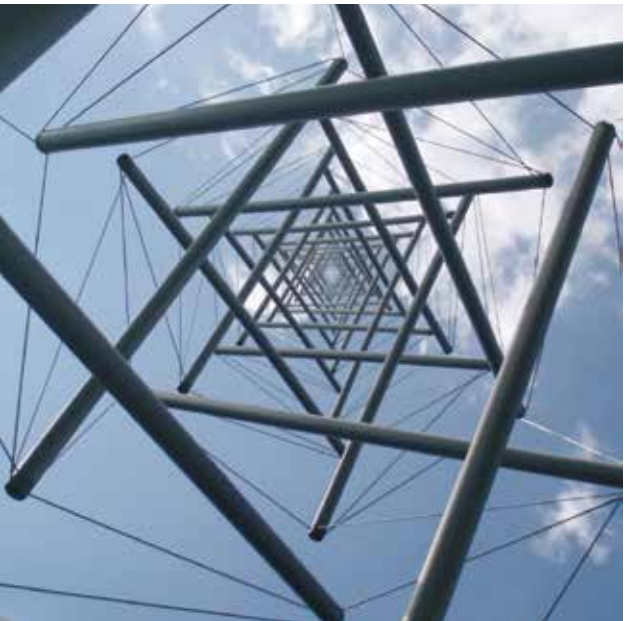

INSPIRATION & DESIGN PROCESS

TENSEGRITY is a form of construction that uses rigid elements interconnected by tensioned cables or ropes to create strong, flexible, and adaptable structures.

It is used in structural engineering, architecture, and mechanical systems design. In nature we find it in the human body within the bone structure, the muscular system, the connective tissue, as well as spider webs, bird nests and fern leaves.

HOW IT WORKS

SHAD developed a tension cable system with 4 incorporated guides inside of the case's frame. The expansion and contraction movement is transferred uniformly in all the mechanism. This allows a smooth and uniform expansion SYSTEM
